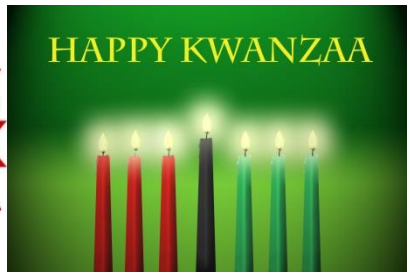
We very much appreciate your continued support and ask you to renew promptly so Jim doesn't have to send out reminder notices. Thanks for being a member of the ATTS!



PRESIDENT'S MESSAGE

John Ostendorf, R-518

Dear fellow sales tax token collectors,

I hope this letter finds you well.

First of all, let me apologize for the type of paper used in the last Newsletter. My intent is to use regular weight paper, double sided. I missed something in placing the order with the printer. I'll be more careful in the future.

It is renewal season again. We really appreciate all our members and hope that everyone will renew. Our membership has held steady in recent years. We all would like to see that increase, but that could be said for every numismatic organization out there. We have a good group. Bill has been putting out a very nice Newsletter and we have strived to get it to you in a timely manner. I don't think we've been late for at least three years now, probably longer. So I ask you to take a moment and please renew for 2019.

The other thing to ask for is your contribution to the Newsletter. Go through your collection and I am sure you will find something of interest that can turned into a short article. There is so much out there on the internet. In this issue you will find an article I wrote on something I found in my collection. Every token tells a story. What's yours?

Happy collecting, John

LETTERS TO THE EDITOR

Send your own questions, comments, corrections, or information to:

BILL at: Wjmhands@gmail.com

This issue's LTTE contributors include: add in names – all getting a brownie point for the fun of sharing with us. THANKS GUYS!!

PLEASE NOTE: If you are emailing me I would greatly appreciate it if you would supply **your full name** and membership number. Often I receive an email from "Jack" and I don't recognize the name off-hand or the email address either. So in order for me to list it here I have to go through my entire email address book looking for "Jack". Likewise, if you don't include your return address on a snail mail, please give me your full name on the written enclosure. Thanks for saving me a little time. I do appreciate EVERY contact but this identification would also be appreciated. **My sincere thanks, as always.**

BILL MYERS WRITES: Joseph McCarthy has found some very interesting items which is shares with us. Nick Sapone researched how ration tokens had an effect on the production of sales tax tokens during World War II. Courtesy of Nick Sapone Merlin Malehorn's research notes on New Mexico sales tax tokens is presented. John Ostendorf discusses a very interesting tax token holder from Cicero Illinois.

This newsletter covers the winter holiday period and I wish everyone a Happy Thanksgiving and Happy Holidays (Christmas, Hanukah, Kwanza). While you are sitting around digesting your holiday meal, jot down a few lines about interesting sales tax tokens or related items and send it to me. If you get a gift of sales tax tokens send me a note, I am sure the membership would like to hear about it.

JOSEPH MCCARTHY (L-616) WRITES: Just returned from a trip to the Midwest where I was able to SCORE the attached Ohio State Punch Card from a coin dealer. The card reads: 98467 R, F & W Grand Stores / Ohio / License No 5702361. It has two "10's" punched out. It has one slopping crease on the top Left side, has some discoloration, and otherwise is in great shape/condition.

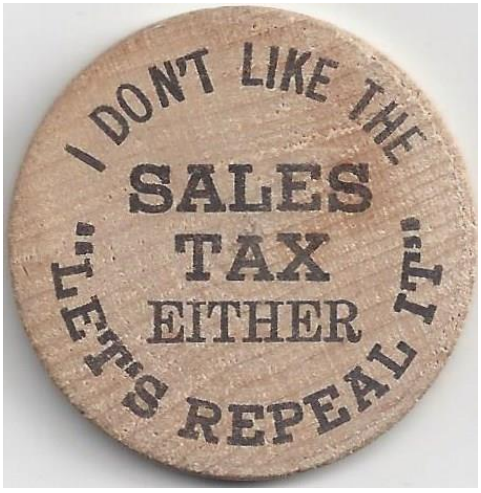
I recently found this Wooden Nickel in a dealer's "Token" bucket. (Editor's note- this is TX-R7, a great find!).



I am attaching scans of two recent acquisitions; Ohio SPC3B FWW (possibly new) and a Missouri counterstamp.

The Ohio SPC3B FWW I was unable to locate in Monte's book. Serial #: RED No. 325254, Control "I", Vendor's Stamp is RED, Vendor's License No. 310384. I purchased it as part of a major Revenue (multi state) stamp accumulation/Lot for $12.50 plus $11.27 postage & handling. Among the Ohio items were Ohio numerous consumer stamps.

Tax Token and Ration Token Crossover Notes

By Nick F. Sapone R-517

Fiber Tax Tokens

Plastic Tax Tokens

A new member's request (at SRTC) for more details about ration token fiber has caused a more thorough review of my study material on WW-II era fiber tokens, which includes sales tax tokens. During this search I also found some things of interest relating to both fiber and plastic tax tokens.

The M&D book (in the last 3 paragraphs on page 15) says in essence that both metal and fiber became unavailable for tax token use in 1943. This is why the switch-over was made to plastic tax tokens. Then fiber became available again as WW-II was drawing to a close in 1945.

Fiber OPA Ration Tokens

As I read this, I recognized that those events had occurred during the same time period that ration tokens were being made and used. And it only took a moment to realize that the greater need for OPA Ration Tokens is what had caused the unavailability of fiber for sales tax token use!

These are gems of crossover information that I had not considered prior to this follow-up review.

It appears that the OPA's much higher priority for food ration tokens made of fiber is actually what caused the unavailability of fiber for tax token use in 1943. This same priority is what caused all of those plastic sales tax tokens to be made that were also needed. There was no real shortage of fiber, "except for its use as tax tokens."

There was plenty of this material available because the fiber was basically cellulose that, in this case came from cotton linter, which is a byproduct of ginning, and saw dust that was refined into wood pulp. But the War Production Board (WPB) had stopped the use of fiber for tax tokens so that ration tokens could be made from those raw materials, because ration tokens were more important to the war effort. The WPB needed the bid-winning fiber companies to concentrate their efforts toward producing the special blend of security fiber that ration tokens are made of. And a lot of this special material was required to make two billion ration tokens that were in great need on the home front, with a fast approaching deadline for delivery!

Similar things were happening at this time to many other manufacturers who were being shifted over to war production. For instance, passenger cars were in short supply because the car companies were now making military vehicles, instead of cars for the public. And the aircraft companies were converted to making various warplanes, such as the fighters, bombers and transport planes that were urgently needed in large numbers for the war effort.

It never ceases to amaze me that so many new and interesting things can still be learned about our hobbies of collecting and studying tax tokens and ration tokens, along with the connections that have been found between them.

There is likely to be many other kinds of tokens made by ORCO and other token companies that have various things in common with our ration token and tax token collecting hobbies as well.

Some of those details are even more interesting when they are recognized for their greater value of being true gems of crossover information.

MERLIN MALEHORN'S NOTES ON NEW MEXICO TOKENS

Nick Sapone has an interest in errors on sales tax tokens and was communicating with Merlin Malehorn in 1999. In August 1999 Merlin mailed some of his technical notes from his research to Nick. Notes for Arizona were published in issue 180 and these are the notes for New Mexico.

CICERO, ILLINOIS SALES TAX TOKEN HOLDER

By John Ostendorf (R518)

A very interesting little find I acquired a few years ago is a sales tax token holder from Cicero, Illinois. Cicero, a suburb of Chicago, is about 10 miles west of downtown Chicago. It was the headquarters of Al Capone because it was out of the reach of the Chicago Police Department. Per the book, Cicero Revisted", Al Capone virtually ran the town from the mid-1920s until prohibition ended in 1933. He and his "staff" occupied an entire floor of the Hawthorne Hotel which was at 4833 Cermack Road, across the street from several of the merchants who issued this STT holder. Sadly, all of the original buildings are gone now and these sites are now occupied by new buildings and parking lots.

This holder was designed to hold 20 IL-S4 or a total of 30 mills (3 cents) worth of tokens. The holder measures 100mm x 174mm when completely unfolded and 31mm x 100mm when completely folded. It has the advertisements for four merchants on panels measuring 31mm x 100mm. The four merchants obviously collaborated to create this holder probably in 1935 or shortly thereafter since IL-S4 was struck in 1935. The holder is made of orange paper and reinforced in the middle with cardboard for holding the tokens. Some of my photos make the holder look more of a buff tone, but it is definitely orange.

The four merchants were La Vida Specialty Shop at 4804 Cermak Road, Pruckler's Toggery at 4814 Cermak Road, Kelly's Restaurant and Green Room at 4818 Cermak Road, and Phillip Bros. Shoe Store at 4906 Cermak Road, Cicero.

None of these four businesses are still around. I couldn't find much on the internet except for a few mentions of Pruckler's Toggery as an authorized merchant for Wilson Bros. Furnishings, a men's clothing line.

The Pruckler's Toggery advertisement calls this holder a "Tax Pax" and mentions that it is worth $1.00 toward a made to measure suit, topcoat, or overcoat. So basically, a completed holder with 3 cents worth of sales tax tokens could be converted into a $1 coupon. None of the other three merchants use this holder as a coupon. The holder is called a "Tax Pax" on the spine and a phone number is provided for other merchants who may want to order these. Unfortunately, there is no printer's name. It is fun to imagine the printer's salesman going door to door in order to get four unrelated merchants to collaborate on this, certainly not an easy task.

It is quite possible that other "Tax Pax" exist for other merchants. Keep an eye out, it would be great to see some more of these!
